				<u>91.00</u>
Total Reimburseable				\$251.37 *

**James W. Rouse -
Trip to Europe**

* These costs were incurred primarily in connection with the examination of new towns that have been and are being developed throughout Europe. The purpose of this examination was to gather information concerning site selection, design, construction, leasing, sales, management, and overall planning and development of these projects for the purpose of employing this information in the planning and development of 14,000 acres of land acquired in Howard County, Md. In addition, sessions were held in London with two Merchant Banking firms on possible future financing for CRD, Inc. One of these firms is now a CRD stockholder.
